NEWS RELEASE

June 2023

Tao Kong joins the Luminous team in the US

Tao Kong joins the Luminous Energy Group as Managing Partner of Luminous Energy Renewables LLC, focusing on developing the business across the US.

He is well placed to drive the business having been Founder and COO of Alcen Inc, overseeing all aspects of renewable energy development; this, combined with his passion and commitment to sustainable energy solutions, means Luminous has the pieces in place to achieve its plan to expand in the US.

‘It’s an exciting opportunity to be part of the Luminous team and to play a key role in developing the US business,’ explains Kong. ‘We know we’ve got some big challenges ahead, like managing procurement and the supply chain and working around the limitations of the current transmission infrastructure. But these challenges also give us so much opportunity. One thing I’m looking forward to is forming strategic partnerships with global manufacturers eager to establish or expand their onshore manufacturing capacity in the United States, for example.’

Luminous Energy already has a presence in the US, but, says David Bryson, Chief Operating Officer, ‘the company has been ready for some time to expand its footprint in the US and now with Tao in place, the business can realize its ambitions.’

As a nation, the US is keen to decarbonise the power grid and this is totally in line with company’s mission.

Positioned as an international renewable energy developer, Luminous Energy is poised to leverage the opportunities and swiftly establish a strategic presence in the US market. By capitalizing on its global experience, expertise, and connections, Luminous Energy is capable of addressing the challenges of securing dependable and cost-effective supplies for renewable energy projects.
