Luminous Energy secures a Contract for Difference in the Allocation Round 7

Cattybrook Solar Farm is the third consecutive Luminous Energy project to secure a CfD

Monday 16 February 2026, Corsham, Wiltshire, UK

Luminous Energy has successfully secured a 20-year Contract for Difference (CfD) for its solar PV project, Cattybrook Solar Farm, in the latest allocation round.

In this latest renewable auction, there are record levels of new solar and onshore wind projects, but securing a CfD for Cattybrook Solar Farm, with an installed capacity of 61.5MWp, is particularly notable for Luminous Energy as it's the third consecutive successful CfD contract award. Explains Guy Lavarack, Chief Investment Officer for Luminous Energy Group, 'We are proud to be awarded a CfD contract in this latest auction as it secures a long-term offtake for the project which will assist with the financing of the solar farm as we progress the onward development of the project. This our third project in a row to secure a CfD contract, following Bracon Ash Solar Farm and Duxhurst Solar Farm. It's a good boost to the country's 2030 net zero strategy to accelerate new renewable capacity and it's a boost for our project providing long-term revenue security'.

The auction cleared at £65.23 per MWh in 2024 pricing which is 13% below the administrative strike price set by the government and broadly in line with industry expectations, reflecting the move from 15-year to 20-year contracts, as well as increasing competition for this valuable off-take contract.

With the revenue off-take contract now secured as well as recent receipt of a Gate 2, phase 1 notification Cattybrook Solar Farm is now well placed to continue its onward development towards construction. Luminous Energy's distribution connected solar portfolio in the UK now stands at over 200MWp across 4 projects, all with either Gate 2 phase 1 or phase 2 grid connection offers.
